

National Health Care Associates, Inc. and Affiliates has partnered with **Rx Manage** to offer you savings on your prescription medications. You can now order medications from the International Program at **zero co-pay** on the **Premium, Standard and Basic** plans.

What is the International Program?

The Program allows you to order from a formulary of over 250 brand medications from pharmacies in New Zealand, Australia, Canada and England.

Will my medication be exactly the same as what I currently take?

Yes it will. To be on the formulary a medication must be available from the same manufacturer internationally as the US brand, or from the International license holder.

Can I send in a prescription for a newly prescribed medication?

RxManage is unable to supply newly prescribed medication. When taking a newly prescribed medication a trial supply needs to be obtained locally. This ensures that you have been advised how to take the medication and are aware of possible side effects. The medication trial is to make certain that there are no adverse reactions to the medication and that your physician would like you to continue on the medication long term. After your 30 day trial you can then order a 90-day supply using our program.

How long will it take to receive my medication?

10-15 working days after the order has shipped. Please make sure you have a 30-day supply on hand before placing your first order for each medication.

How do I place a refill order?

Refill orders are placed automatically. You will receive a refill reminder by phone or email. Any changes are to be notified to Rx Manage within 48 hours. If no changes are notified the order automatically ships, ensuring a smooth continuous supply of medication.

Where do I go if I have questions about the program?
